CERTIFICATE BY FUNERAL HOME UPON TRANSFER OF DECEDENT'S REMAINS TO CREMATORY

The Funeral Home certifies that the remains being transferred to the custody of the Crematory are those of the Decedent identified in Section 1 hereof and that the Funeral Home, based upon the representations of the Authorizing Agent in Section 5 hereof, has taken reasonable precautions to ensure the removal of any Device listed in Section 5 from the Decedent's remains or to render such Device non-hazardous. The Funeral Home also certifies that any items listed in Section 10 hereof have been removed from the remains of the Decedent for the purpose of delivery to the Authorizing Agent and that a Burial Permit or Burial Transit permit authorizing the cremation of the Decedent's remains has been obtained.

Date: _____ Funeral Home: Schoedinger Linden Memorial Chapel

By: _____

15. THE CREMATION PROCESS

The cremation of the Decedent's remains may take place before or after ceremonies to memorialize the Decedent. Cremation is performed to prepare the remains of the Decedent for final disposition. It is carried out by placing the Decedent's remains in the casket or alternative container, which is then placed into a cremation chamber or retort where they are subjected to intense heat and flame. All cremations are performed individually unless noted otherwise in Section 6. During the cremation process, it may be necessary to open the cremation chamber and reposition the remains of the Decedent in order to facilitate a complete and thorough cremation. Through the use of suitable fuel, the incineration of the container and its contents is accomplished and all substances are consumed or driven off, except bone fragments (calcium compounds) and metal (including dental gold and silver and other nonhuman materials) as the temperature is not sufficient to consume them.

Due to the nature of the cremation process any personal possessions or valuable materials, such as dental gold or jewelry (as well as any body prosthesis or dental bridgework) that are left with the Decedent and not removed from the casket or container prior to cremation may be destroyed or if not destroyed, will be disposed of by the Crematory. The Authorizing Agent understands that arrangements must be made with the Funeral Home to remove any such possessions or valuables prior to the time that the remains of the Decedent are transported to the Crematory.

Following a cooling period, the cremated remains, which will normally weigh several pounds in the case of an average -size adult, are then swept or raked from the cremation chamber. It is impossible to remove all of them, as some dust and other residue from the process will be left behind. In addition, while every effort will be made to avoid commingling, inadvertent and incidental commingling of minute particles of cremated remains from the residues of previous cremations is a possibility, and the Authorizing Agent understands and accepts this fact.

After the cremated remains are removed from the cremation chamber, the crematory uses its best efforts to remove from the cremated remains all non-combustible material such as dental bridgework, fillings and implants, implanted medical devices and metal hinges, latches, and nails from the cremation container. The authorizing agent gives express permission for this non-combustible material and medical devices detailed in section 5 of this document to be disposed of as medical waste, donated for scientific research, or recycled by a third-party company. The authorizing agent understands that the crematory is compensated by the recycling company. All such compensation paid to the funeral home and/or crematory shall be donated to a charitable organization.

When the cremated remains are removed from the cremation chamber, the skeletal remains often will contain recognizable bone fragments. Unless otherwise specified, after the bone fragments have been separated from the other material, they will be mechanically pulverized. The process of crushing or grinding may cause incidental commingling of the remains with the residue from the processing of previously cremated remains. These granulated particles of unidentifiable dimensions, which are virtually unrecognizable as human remains, will then be placed into a designated container.

16. CASKET OR ALTERNATIVE CONTAINER

The remains are to be cremated in a combustible casket or alternative container that is capable of being completely closed, is resistant to leakage or spillage, is sufficiently rigid to be handled easily, and provides protection for the health and safety of Crematory and Funeral Home personnel. The Crematory is authorized to inspect the casket or alternative container, including opening it if necessary.

In the event that the casket or container does not meet the above requirements, the Crematory will notify the Authorizing Agent. Many caskets that are comprised primarily of combustible material also contain some exterior parts (decorative handles or rails) that are not combustible and that may cause damage to the cremation equipment. As Authorizing Agent, I authorize the Crematory, in its discretion, to remove and discard the non-combustible materials. I understand that metal caskets are not accepted. I further understand that the casket or alternative container will be consumed as part of the cremation process.

17. URN OR TEMPORARY CONTAINER

After the cremated remains have been processed, they will be placed in the urn listed below or, if an urn is not provided to the Crematory, in a temporary container provided by the Crematory. Subsequently, the cremated remains will be transferred from the temporary urn to the urn listed below. The Authorizing Agent acknowledges that it is impossible to recover all of the dust and residue from the cremation and processing.

In the case of an adult, it is recommended that the urn or temporary container be a minimum size of 200 cubic inches. In the event the urn or temporary container is insufficient to accommodate all of the cremated remains, the excess will be placed by the Crematory in a secondary container. This secondary container will be kept with the urn or the temporary container and handled according to the final disposition instruction set forth in Section 9; provided, however, that the secondary container may not be designed for shipping.

All urns or containers provided to the Funeral Home or Crematory must be appropriate for shipping.
